AI-First Manufacturing Workflows

Deliver customized manufacturing workflows
with unified AI, No-Code applications and CRM

AI-powered, customizable manufacturing workflows delivering **Total Experience (TX)** to all stakeholders.

Round Infinity delivers cutting-edge manufacturing applications & workflows, leveraging No-Code, CRM, and AI for end-to-end manufacturing excellence.

Our No-Code customizable platform streamlines the entire manufacturing lifecycle - from production and materials management to quality control and plant maintenance to customer service.

With AI automation and full customization, manufacturers can optimize operations, enhance efficiency, and ensure top-quality output. Integrated CRM allows to automate omni-channel customer service, marketing, field service & sales.

Key benefits include optimized production workflows, streamlined supply chain operations, high-quality standards, timely deliveries, minimized downtime, and efficient customer service.

Round Infinity is the ideal choice for CEOs seeking to revolutionize their manufacturing processes and achieve operational excellence.

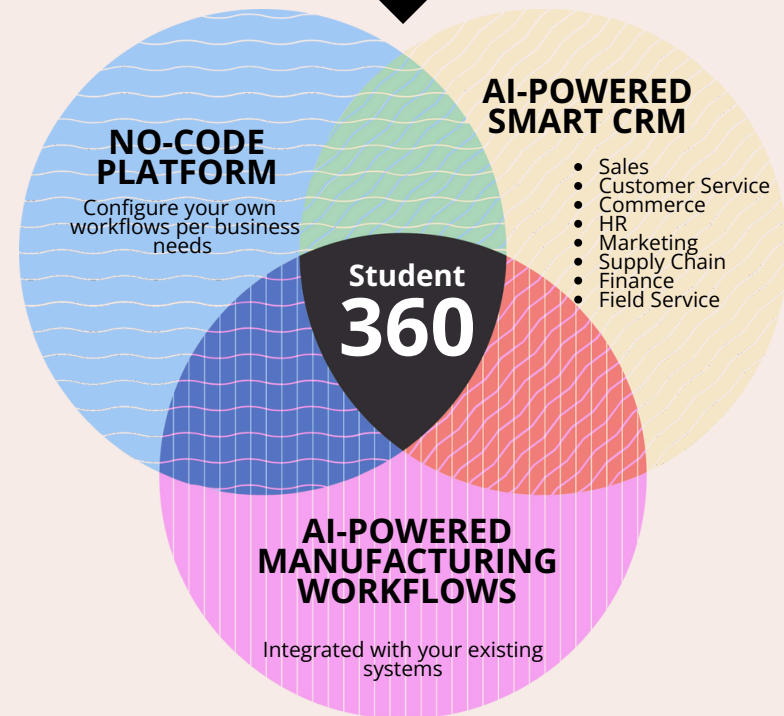

The Vision

Our vision is to revolutionize manufacturing workflows by providing a highly customizable and AI-powered platform that seamlessly adapts to the unique needs of each manufacturer.

We aim to optimize manufacturing processes through intelligent automation, enhance operational efficiency with data-driven insights, and empower manufacturers with advanced tools that drive productivity and innovation.

Customers, Employees, Suppliers

The Problem

Outdated Legacy ERP Systems Hindering Manufacturing Efficiency

Legacy ERP systems in the manufacturing industry face significant challenges such as limited customization, outdated technology, complex integration, inadequate data analytics, high maintenance costs, high licensing fees, scalability issues, and user adoption hurdles. These problems hinder operational efficiency, adaptability, and innovation.

The Solution

Digitize & Automate End-to-End Manufacturing Workflows in Hours with AI, No-Code, and CRM

One no-code, AI, & CRM-powered workflow automation platform that orchestrates end-to-end manufacturing journeys in hours, delivering operational efficiency, cost reduction, and a breakthrough Total Experience (TX) to all stakeholders.

End-to-end customized manufacturing journeys on one platform.

Product : AI-Powered Fully Customizable Manufacturing Workflows

Production Management

Production planning, scheduling and real-time monitoring of production activities.

Materials Management

Manage the entire lifecycle of materials from procurement to storage.

Quality Control Management

Maintain quality standards with quality planning, inspections, and corrective actions.

Inventory Tracking System

Track inventory of materials and finished products & check the work-in-progress status

Purchase & Sales Management

Streamline procurement & the sale of finished goods with PO, supplier management, etc.

Packaging/Transportation

Manages the packaging and transportation of finished goods to distribution centers.

Test Certificate Management

Manages and records test certificates for products to ensure compliance.

Plant Maintenance & Schedules

Monitors and schedules maintenance activities of machinery to minimize downtime

Finance Management

Manages financials - AP automation, expense claims, budgeting, & reporting

Product : AI-Powered Fully Customizable Manufacturing Workflows

Asset Management

Keep a record of equipment age, life span, current condition, location, maintenance, etc.,

Bills of Materials

Generate bills of materials and track changes in them and identify discrepancies

Warehouse Management

Organize warehouse & track inventory across warehouses.

Smart Manufacturing Integration

Integration with the latest AI, WhatsApp / Chatbot integrations.

Vendor Management

Keep vendor information and data in one place and manage vendor communication.

Retail POS & Online Store

Integrated POS & Online Store that helps units with retail outlets generate invoices

Warranty Management

Easily issue warranties, track reminders & send payment links, & run analytics.

Unit-wise Planning and WIP Status

Provides detailed planning and real-time status updates for work-in-progress.

Stock Transaction Analysis

Analyzes stock transactions to identify trends, patterns, and areas for improvement.

Product : **Integrated No-Code Platform**

No-code platform to configure custom business applications & workflows, without any coding.

Custom Apps & Workflows

Without any coding, create mobile responsive custom business applications & workflows.

Custom Reports & Dashboards

Without any coding, create custom reports, analytics & dashboards.

External Systems Integration

Without any coding, easily pull and push data to or from RoundInfinity.

Mobile Responsive Self-Service Portal

Allow users to self-serve, raise requests, check status, contact support, etc.

User 360

Automatically get a single 360 view of your all your users across departments.

Knowledge Management

Quickly build an AI-powered mobile responsive self-service help center.

Payment Links

Easily collect payments for products or services you sell & auto-generate invoices.

eSignatures

Allow users to securely access, view & eSign any document, contract, agreement, etc.

Appointments Scheduling

Digitalize end-to-end appointments workflow from booking to payment.

Product : **Integrated AI-powered Smart CRM**

AI-powered Smart CRM integrated with no-code custom business applications & workflows.

Customer Service

Delight customers with an AI-powered automated omnichannel contact center.

Sales

Customise sales workflows & empower sales teams with AI automation to close more deals.

Marketing

AI-powered marketing automation to help you generate leads and drive growth.

Commerce

Quickly launch your online store or Point-of-Sale terminals to increase revenue.

Finance

Leverage AI-automation to automate invoice processing, expense claims, payments, etc.

Supply Chain

Modernize supply chain workflows, streamline procurement, and optimize fulfilment.

HR

Provide self-service to employees, transform employee workflows & use AI to hire smarter.

Field Service

Deliver intelligent onsite service & manage your field workforce, assets, and customers.

The Difference

- End-to-end manufacturing journeys on one platform, from production to service.
- Each manufacturing application & workflow is fully customizable per company needs.
- Deliver a breakthrough mobile responsive Total Experience (TX) to customers, employees & suppliers.
- Get 360 view of each customer, employee or supplier in a single click.
- Leverage WhatsApp, email, Twitter, etc. for marketing & customer service.
- Leverage out-of-box AI-powered voice bots to automate contact center call responses.
- Leverage out-of-box AI-powered messaging bots to automate responses on WhatsApp, email, etc.
- Leverage out-of-box AI-automation to automate HR, Accounts Payable, expense claims, etc. processes.
- Leverage payment links for payment collection.
- Auto-generate documents such as price quotes, invoices, purchase orders, etc.
- Without writing any software, configure your own new custom apps & workflows per your operational needs.
- Significantly lower your total cost of ownership.

Business Impact

Enhanced Operational Efficiency

Streamline processes and minimize errors with intelligent automation and workflows.

Improved Data-Driven Decision Making

Gain real-time insights to make informed decisions and implement continuous improvements.

Seamless Integration and Customization

Tailor the ERP solution to your specific needs with extensive customization and integration.

Enhanced Customer Relationship Management (CRM)

Manage customer interactions effectively to build stronger relationships and improve satisfaction.

Scalability and Cost Efficiency

Scalable, cloud-based solution that reduce maintenance costs and improve performance.
