

roundinfinity

AI-Powered No-Code Platform For Workflow Automation

Without any coding, create mobile responsive custom business applications , workflows, dashboards, & integrations.

Harnessing the power of Round Infinity's no-code platform, businesses can rapidly create custom applications, automate workflows, and craft real-time reports and dashboards—all without a single line of code.

This transformative capability drives operational efficiency, slashes development and maintenance costs, and accelerates time-to-market.

The mobile-responsive self-service portals empower users to take control, enhancing customer satisfaction and streamlining processes. With seamless integration into external systems, data flows effortlessly, while the User 360 feature offers a holistic view of user interactions.

Together, these innovations enable precise, data-driven decision-making, maximizing ROI and propelling business growth.

Capabilities

Custom Apps & Workflows

Configure mobile-responsive business apps and workflows effortlessly.

Mobile Self-Service Portal

Allow users to self-serve, raise requests, check status, contact support, etc.

Workflow Automation & SLAs

Automate task assignments, process flows routing & track SLAs/escalations.

Custom Notifications & Alerts

Set up automated email, SMS, or Whatsapp alerts to keep users informed.

Real-Time SLA Dashboard

Monitor SLA metrics in real-time with SLA dashboard available in each business app

Custom Reports & Dashboards

Without any coding, create custom reports, analytics & dashboards.

User 360 View

Gain a comprehensive view of user interactions and data across the platform.

Process History

Easily track who approved/worked on which business record, at what time.

Document Generation

Auto-generate and manage documents within custom workflows.

Secured Data Access

Securely access, download, & search data or bulk upload data using CSV.

External Systems Integration

Seamlessly exchange data with external systems without coding.

WhatsApp Integration

Seamlessly send WhatsApp alerts as part of workflows to keep users informed.

Role-Based Access Control

Customize access levels and permissions for different users.

Contextual Collaboration

Contextually collaborate and comment on any business record or workflow task.

Payments Integration

Easily connect workflows with payment gateway to collect payments.

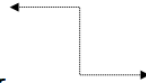

How it Works

1

No-Code Custom Apps & Workflows Builder

Configure new custom app or modify out-of-box app, attach workflow & provide access to users.

2

Mobile Responsive Self-Service Portal

Using mobile responsive self-service portal securely access business applications & complete workflow tasks.

3

360 View

Gain a comprehensive 360 view of user interactions and data across business applications.

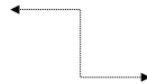

4

No-Code Reports & Dashboards Designer

Without any coding, create custom reports, analytics & dashboards. Filter data & download to PDF or excel. Schedule to auto-generate.

5

No-Code External Systems Integration

Without any coding, easily pull and push data to or from RoundInfinity. Auto-generate REST APIs & data triggers to push or pull data.

Business Impact

Increased Operational Efficiency

Automate workflows, reducing manual effort and speeding up processes.

Cost Savings

Eliminate the need for coding, lowering development and maintenance costs.

Faster Time-to-Market

Quickly deploy custom apps and integrations, accelerating new product launches.

Enhanced Decision-Making

Real-time analytics and dashboards provide data-driven insights for better decisions..

Improved Customer Experience

Self-service portals empower users, leading to higher satisfaction and faster resolutions.
